The North Alabama Extension Corn and Soybean College will be Wednesday, November 2, 2016 at the Guntersville State Lodge, 1155 Lodge Drive, Guntersville, Alabama. Randy Dowdy, the first farmer to produce 500 bushels of corn per acre and current world soybean record holder at 171 bushels per acre, will be our speaker. Randy will be sharing his production practices for high yields.

Registration and dinner will be from 5:00-6:30 pm with Randy speaking at 6:30 pm. This will give growers plenty of time to visit our sponsors’ booths. I will also have a production notebook for each grower.

Preregistration is required for a head count on the meal and the production notebook. Please call me if they plan on attending at 256-557-2375 or you can e-mail me at dem0029@auburn.edu
