

**Alabama On-Farm Corn Hybrid Program
2017 Performance Test Result – Preliminary Report
South Alabama Location - Irrigated**

Brand	Hybrid ¹	RM Days	Houston County Bu/A ²
Croplan Genetics	5678 VT2P/RIB	116	238.8
Croplan Genetics	6640 VT3P/RIB	113	221.1
DeKalb	DKC68-26 (VT2P)	118	217.4
DeKalb	DKC70-27 (VT2P)	120	229.3
Dyna-Gro	D57VC51	117	240.0
Pioneer	P1197YHR	111	221.6
Pioneer	P1916YHR	119	198.3
Location Yield Average (Bu/A)			223.8
Test Replication(s) Harvested at Site			Two
Seeding Rate/Acre			33 K
Soil Series			Dothan Sandy Loam
Planting Date			March 29
Harvest Date			August 5

¹ Dash (-) indicates hybrid not planted/data not reported at that location.

² Yields adjusted to 15.5% moisture, assumed test weight of 56 lbs bu⁻¹, and calculated to bushels/acre (Bu/A).

Appreciation is expressed to our cooperating farmer, the Alabama Wheat and Feed Grain Committee, and the participating seed companies for supporting this program. Test conducted by Brandon Dillard, Regional Extension Agent-Agronomic Crops, with the Alabama Cooperative Extension System (ACES).
