

# Alabama Precision Agriculture Extension Program 2017—2018 PRECISION AGRICULTURE WORKSHOPS

**Nov.  
30**

## **Precision Ag. Planter Clinic**

Precision planting is critical for even emergence, good plant health and final yield. During this event, several private companies will showcase the latest on precision planting technology and rate controller technology. Clinic is limited to 150 people.

Date: November 30, 2017 - E. V. Smith Research Center

Register for FREE by Nov.20th at: <http://bit.ly/2jMBNyp>

**JAN.  
18**

## **Advanced Precision Agriculture Workshop**

This workshop will highlight five Precision Agriculture technologies/strategies. Morning presentations will be made by University faculty and afternoon presentation by industry.

Date: January 18, 2018 - Place: The Hotel at Auburn University

**JUN.  
29**

## **Yield monitor calibration and use of yield data**

Accurate data will result in right management decisions. During this workshop, we will review the key steps to yield monitor calibration. Additionally, hands-on exercises on basic yield data analysis will be included. This workshop is limited to 50 people.

Date: June 29, 2018—E. V. Smith Research Center

**Nov.  
30**

## **Using your Precision Ag. data to support decisions**

This workshop will help farmers analyzing the data collected from Precision Ag equipment to support their management decisions.

Date: November 30, 2018

**Almost all of these workshops will take place at the  
E.V. Smith Research Center Conference Room—4725 County Rd. 40. Shorter, AL**
