Garmin Colorado Set-up

Shannon Huber Norwood
Multi-County Extension Agent
Front view of Colorado

Rock ‘n Roller. Rolls to left and right. Center button is like an enter key.

Soft keys.
Back view of Colorado

Battery cover. Lift tab at bottom and pull down to remove.
Top view of Colorado
**Setup**

Use the Rock ‘Roller to get to the set-up icon. Then press enter (center of Rock ‘n Roller).
Setup

This is the set-up menu. First, select ‘System’ by highlighting it (using the Rock ‘n Roller if it is not already highlighted) and then pressing enter.
Setup

Make sure that WAAS is selected. If ‘WAAS’ does not appear under ‘GPS,’ press enter when ‘GPS’ is highlighted.
**Setup**

Use the Rock ‘n Roller to highlight ‘WAAS’ and press enter.

Calibrate Compass.

You must be outside to calibrate the Compass.
Connecting Colorado to your laptop.

First, the Trip and Waypoint Manager software must be installed on your laptop. Insert the CD and follow the on-screen directions for installation. Once the program is installed, use the USB cable to connect the Garmin to your laptop. Once connected, you will see the Garmin Colorado icon appear on the ‘My Computer’ screen.
Area Calculation
Press start and walk around the perimeter of the area you want to calculate.
