To: All ACES Employees

From: Gaines Smith
Extension Director, Interim

Subject: ACES/Ag Computer Management and Security Policy

As information technology resources in the Extension System have become more sophisticated, securing and managing those resources have become primary concerns. The "ACES/Ag Computer Management and Security Policy" establishes standards and procedures for protecting and managing our computers and network. The policy is based upon emerging standards throughout Auburn University and within the AU Office of Information Technology as well as existing AU IT policies. The administrative leadership of the COA, AAES, and ACES have approved this policy and have charged the Computer Technology Unit (CTU) with implementing it throughout the ACES/Ag network. The new policy has been posted to the CTU web site at <http://www.aces.edu/ctu/techref/policies/>.
