11:00 to 12:00  Electrical System and Generator Maintenance for Hot Weather
12:00 to 12:45  Lunch

Meeting will adjourn by 2:00 pm
Two 2010 NPTC Hot Weather Hands-on Training Seminars were held in Alabama on April 27 & 29 for Service Technicians and Managers.
A total of 125 industry representatives attended the 2010 NPTC Hands-on Training Seminars.
Gene Simpson updates everyone on emerging energy efficient lighting technologies prior to field demonstrations.
A generator service expert explains importance of proper servicing and how to inspect a generator and equipment to prevent loss of power on a poultry farm.
Gene Simpson demonstrates proper techniques for measuring light intensity in a broiler house.
Jess Campbell demonstrates proper cool cell system cleaning procedures to maximize cooling efficiency.
A fan manufacturing engineer teaches the group basic fan performance and maintenance.
Jody Purswell, USDA Mississippi State Poultry Lab, teaches the group how to use wind speed meters to measure wind speed in a poultry house.
Special thanks to the Alabama Poultry and Egg Association
