Weeds of Southern Turfgrasses

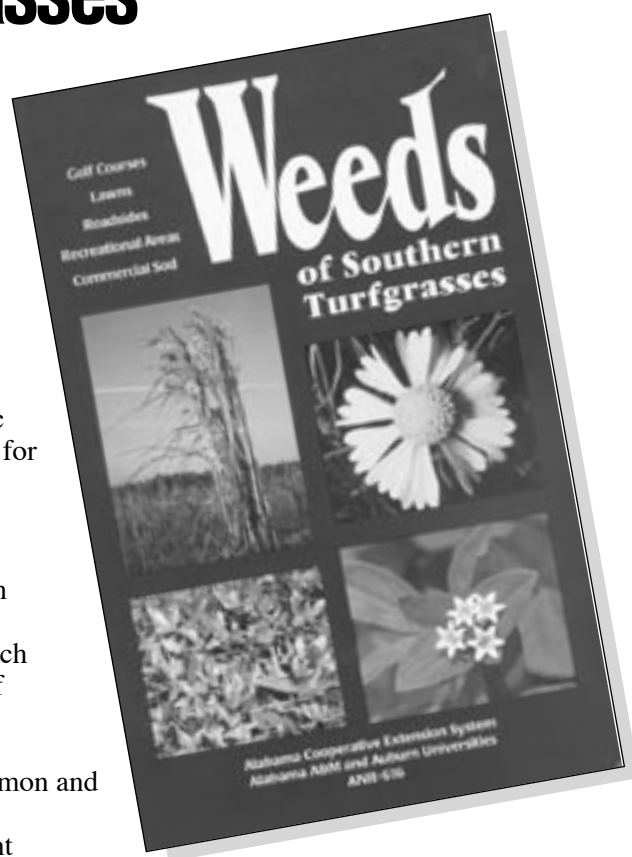

Golf Courses, Lawns, Roadsides, Recreational Areas, Commercial Sod

Weeds of Southern Turfgrasses is an easy-to-use, practical weed identification guide containing color photographs of weed species found in Southern turfgrasses. This book was developed specifically for turfgrass managers, but it can be useful to anyone interested in identifying weeds of Southern turfgrasses. Taxonomic descriptions accompany each species and emphasize important identification characteristics.

Though the guide is most applicable to the South, many of the weed species shown are found across the United States. Geographic range of each weed species is listed for the United States as well as for the world.

This valuable identification guide contains the following:

- 437 total color photographs
- Color photographs of 193 weed species, most photographed in turfgrass habitats
- Easy-to-understand descriptions, including the life cycle of each species; 12 sedge species, 39 grass species, and 135 species of broadleaf weeds
- Glossary of taxonomic terminology
- Index by common name, scientific name, and alternative common and scientific names
- 208 total pages with a waterproof, tear proof cover; convenient 6- x 9-inch size
