

Vegetation for Stream Restoration
December 9-10, 2009 Montgomery, Alabama
www.aces.edu/waterquality/iby.htm

Join us for 'Vegetation for Stream Restoration' workshop held in Montgomery, Alabama December 9-10, 2009. The workshop will center on White Slough, an urban stream in the City of Montgomery Ida Belle Young Park.

This workshop will be conducted immediately following construction of an urban stream restoration project in a municipal park. Participants will learn about riparian plant selection, planting techniques for wetland and streambank vegetation, bioengineering techniques including brush mattresses, and monitoring of riparian vegetation.

Instructors will emphasize urban stream conditions specific to the southeastern U.S. Workshop instructors have experience working on more than 40 stream assessments and restoration projects throughout the Southeast. The workshop will be split between classroom and extensive field work, including project / data summaries evening work sessions. Class is limited to first 30 participants.

Cost is \$250 for general registration \$75 for government / nonprofit. Sorry, no purchase orders. Checks should be made payable to **Alabama Cooperative Extension System** or contact Eve Brantley via email for information on paying with credit card.

CEUs from Auburn University will be available for this workshop.

For more information, email Eve Brantley at brantef@aces.edu

For advanced registration, please send registration and workshop fee to:
