Watershed Academy:

Principles of Water Quality Monitoring, Planning and Restoration

**November 13-15,
2007**

**Kimbel Center
Hobcaw Barony
Hwy 17N
Georgetown, SC**

Natural resource professionals will have the opportunity to enhance their skills at this challenging workshop on the scientific nuts and bolts of watershed monitoring, planning and restoration. *Space is limited to 30 participants* who will delve in-depth into watershed characterization, hydrology, water quality monitoring and assessment, restoration options, and watershed planning. Skills gained at this workshop will improve participants' ability to identify problems and solutions for their local watersheds. This is not for the faint of heart! The Academy will mix hard work and analysis with plenty of free time to enjoy the fall season on South Carolina's beautiful coast. Engaging presentations from regional experts, coupled with hands-on field tours, will provide a well-rounded experience for workshop participants to enhance their ability to work in the areas of watershed planning, restoration, and management. We hope that YOU will attend!!

*Registration Fee**:*

\$195 before Oct. 19, 2007
\$245 after Oct. 19, 2007

*** Non-profit organizations
receive a \$50 discount***

Deadline Nov. 2, 2007

Additional sponsors:

- Clemson University
- North Carolina State University
- Auburn University
- North Inlet-Winyah Bay National Estuarine Research Reserve
- EPA Region 4
