

INSECT PESTS AND INSECTICIDAL RECOMMENDATIONS

Reference: Vegetable crop handbook for the Southeastern U.S. developed by the Southeastern Vegetable Extension Workers

Click on the products listed to read the full label for that product. Producers should also see the handbook for application rates, restrictions, and preharvest intervals.

BEAN (SNAP, LIMA, POLE)	Aphid	Bean leaf beetle	Japanese beetle	Bean thrips	Corn earworm	Looper	Cowpea curculio	Cucumber beetle	Cutworm	Grasshopper	Leafminer	Lesser cornstalk borer	Lima bean vine borer	Lygus bug	Mexican bean beetle	Potato leafhopper	Seedcorn maggot	Spider mite	Stink bug	Whiteflies	Wireworm	Insects controlled
Acephate (Orthene)	X			X	X	X		X						X	X	X						8
Bifenthrin (Capture)	X	X	X	X	X	X				X					X	X		X	X	X		12
Buprofezin (Courier)																				X		1
Carbaryl (Sevin)							X	X					X	X	X	X						6
Chlorpyrifos (Lorsban)																	X					1
Cyromazine (Trigard)										X												1
Diazinon (Diazinon , Spectracide)																	X					1
Dicofol (Kelthane)																		X				1
Dimethoate (Dimethoate)	X													X	X	X						4
Disulfoton (Di-Syston)															X							1
Endosulfan (Thionex)							X								X				X			3
Esfenvalerate (Asana XL)					X	X		X	X				X	X	X	X						8
Gamma-cyhalothrin (Proaxis)	X				X	X						X								X		5
Imidacloprid (Admire Pro , Provado)	X																				X	2
Insecticidal soap (M-pede)				X																		1
Lambda-cyhalothrin (Warrior)	X				X	X						X								X		5
Methomyl (Lannate)				X												X						2
Naled (Dibrom)											X									X		2
Phorate (Thimet)															X	X	X				X	4
Spinosad (Spin Tor)				X	X	X					X											4
Zeta-cypermethrin (Mustang Max)					X	X	X	X								X						5
