

Landscape Plants You Should Meet

Tony A. Glover

Regional Extension Agent

Non-Native Shrubs and Small Trees

Adapted to our climate

Adapted to most of our soils

Readily available in the nursery

Daphne odora “Winter Daphne”

- Winter blooming and very fragrant
- Well drained soil – this is a must
- Use in shady borders
- 3-4 feet
- Can be damaged in very cold winters
- Very toxic
- Non-Native - China

- *Deutzia gracilis*
“Chardonnay Pearls”
- Slow Grower
- Sun to part shade
- Rounded growth habit
- About 3 feet
- Non-native

Edgeworthia chrysantha “Chinese Paper Plant”

4-6 feet

Full to
Part
Sun

White,
Yellow,
and
Red
blooms

Non-
Native-
India

Very Early Bloomer, Fragrant Wood used for high quality paper

Lonicera fragrantissima “Winter Honeysuckle

- Sweet smelling winter blooming 4-6' shrub
- Sun to part shade
- Small Fruit

Hydrangea macrophylla

For Pink add
lime

For Blue add
sulfur

Prune after
flowering

Hydrangea macrophylla “Endless Summer

Hydrangea macrophylla “Endless Summer”

- Non-native
- Mophead
- Big leaf hydrangea
- Heirloom plant
- Newer cultivars are selected for remontant (re-blooming quality)

Hydrangea paniculata

- Not native
- Very cold hardy.
- Needs full sun to get the most flowers and to avoid powdery mildew.
- Flowers are on new growth, so prune in late winter or early spring before growth.
- Can be used in a planter.

Hydrangea Paniculata

- Hydrangea paniculata
Variety:
Limelight
Common Name: Hardy Hydrangea

Photo by www.provenwinners.com

Berberis thunbergii “Japanese Barberry”

- For good red color it needs light.
- Careful when pruning – thorns
- Reaches 3 to 6 feet – more dwarf forms exist – next slide

Crimson Pygmy Barberry 2-3'

Abelia X grandiflora “Glossy Abelia”

- Does well in sun or shade
- Very drought tolerant (no wet feet)
- Butterfly attractant
- 3-6 feet (high and wide)
- Many varieties (some variegated)
- Great Non-Native Plant

Abelia Bloom

Abelia "GoldDust"

Abelia grandifolia “Silver Anniversary”

RAZZLE DAZZLE™ Dwarf Crapemyrtles

\$

A new compact shrub crapemyrtle!

The perfect size for borders, beds, and containers.

Retail

- Easy to grow and sun loving
- Range of brilliant colorful foliage
- Good mildew resistance
- Exceptional flowering summer into fall
- Superb for container and patio gardening
- Plant in groups of 3-5 for mass color

Five varieties to choose from.

Cherry Dazzle™

Dazzle™ Me Pink

Raspberry Dazzle™

Ruby Dazzle™

Snow Dazzle™

Para mas información del cuidado de la planta, favor ver la etiqueta.

www.gardenersconfidence.com

A garden you can count on.™

Crapemyrtle - Pokamoke

- A unique dwarf-size, multistemmed shrub with panicles of dark rosy pink flowers that bloom throughout the summer.
- The dark green foliage turns rich bronze-red in fall.
- Use as accent, in containers or massed in borders.
- 3 to 5 feet tall and 4 to 5 feet wide

Loropetalum chinensis “Bill Wallace”

Fuchsia magellanica “Hardy Fuchsia”

- 2-4 feet max here
- Moist – well drained
- Afternoon shade
- Great border or container plant
- Marginal cold hardiness but worth growing
- Non-Native - SA

Rosa banksia “Lady Banks Rose”

- Semi Climber
- Can be stand alone sprawling shrub
- Spectacular bloom in April
- No thorns
- Great for entrance arbors

Knock Out Roses

Patented Plants: Very good disease resistance

Sambucus nigra “Black Beauty”

- Lemon
Scented Flower
– late spring
- Cut back each
year to contain
size
- Poor mans
Japanese
Maple

Spiraea japonica 'WALBUMA'

- Well-drained soil sun or part shade (sunny location is best for the richest leaf color)
- Changes colors through out the seasons (darker later)
- Deciduous

Spirea “LittlePrincess”

- Clusters of rose-pink blooms create a pleasing contrast with mint green foliage.
- Forms a neat compact rounded form that fits nicely in shrub borders.
- Deciduous

Weigela florida

- **Exposure**
Full sun
- **Height**
20-26"
- **Spacing**
24-36"
- **Hardy Temp**
-15°F
- **Uses**
Great in landscapes and also capable of growing in a pot.
- **Deciduous**

Wine and Roses

- Buddleia davidii
“Peacock”
- Butterfly bush
- Non-native,
cutback plant

www.provenwinners.com

Buddleia davidii “Royal Red”

Tall Shrubs

Most on this list are 8' or taller

Many could be grown as a large shrub or
trained in the shape of a small tree

Syringa vulgaris “Lilac” Betsy Ross

- 'Betsy Ross' is the first lilac cultivar to be released by the U.S. National Arboretum.
- Early-blooming lilac
- Abundant, white, fragrant flowers.
- Developed for warmer climate
- 10 feet tall at least as wide
- Has good tolerance to powdery mildew. 'Betsy Ross' was selected for its rounded growth habit.

Hibiscus syriacus “Rose of Sharon”

- **Rose of Sharon, *Hibiscus syriacus*, isn't a rose, but its large, flat blossoms and nectar attract hummingbirds. The flowers on this woody shrub come in several colors, including white, pink, purple, and red. Photo by www.provenwinners.com**

Hibiscus syriacus, Rose of Sharon or Althea

- Non-native shrub
- Species can be invasive
- Easy to grow in full sun site
- Adapted to many soil types
- Greek Goddess series is not invasive

Greek Goddess Series

Helene

Aphrodite

Minerva

Diana

Camellia sinensis

- Common Tea
- White fragrant blooms-early fall
- Some shade
- Well drained soils
- 4-6 feet high
- Non-Native-China

Camellia japonica “Lady Clare”

- Marginal Cold Hardiness
- Best in semi-shade
- Glossy dark green foliage
- For growing info and cold hardiness visit <http://pubs.caes.uga.edu/caespubs/pubcd/B813-w.htm>

Camellia japonica “Victor Emmanuel”

- Medium Size 8-12'
- Fairly Cold Hardy
- Late Bloomer

Camellia sasanqua

- More cold hardy than japonica
- Also, grow in semi-shade
- Normally bloom in the fall
- Smaller blooms and smaller plant than japonica
- <http://www.aces.edu/pubs/docs/A/ANR-0202/>

Camellia sasanqua “Sparkling Burgundy”

Cryptomeria japonica “Black Dragon”

- Sun/Light Shade
- 8-10' tall 4' wide
- Acid soils
- Lots of size and shapes
- Needs good air circulation
- Tolerant of compacted soils – restricted roots

Cupressus arizonica “Carolina Sapphire”

- 20'x12' Pyramidal shape
- Full sun
- Tolerates drought
- Wide pH tolerance
- High humidity may cause problems
- Needs open area with good air flow

Eriobotrya japonica “Loquat”

- Marginal cold tolerance
- Leathery dark foliage
- Sun to semi-shade
- Blooms winter/fruits further south

Ilex latifolia (Lusterleaf holly)

- Large magnolia like leaves
- 15-25' pyrimidal shape
- Good tall screen or specimen plant
- Red berries in fall
- Sun or shade
- Takes very dry soils
- Could be used as small tree

Ilex x attenuata “Dixie”series

- Series of hollies called Dixie – similar to Foster
- Dense dark foliage
- Dixie Dream, Dixie Flame and Dixie Star
- 15-20' tall
- Dixie Star is smaller 10'

Ilex “Mary Nell” Holly

- Several other good pyramidal hollies
- Nellie R. Stephens
- Emily Brunner
- Wirt L. Winn
- All are dense evergreens that do well in full sun to part shade

Juniperus chinensis “Hetzi Columnaris”

- 12-15’ narrow
- Full sun
- Attractive and durable
- Spartan – another like variety
- Well drained soil
- Takes drought

Ligustrum japonicum “Recurvifolium”

- Sun to semi shade
- 8-15’ tough screen
- Variegated forms available
- Takes drought well
- White bloom - spring

Loropetalum chinense “Rubrum – Plum Delight”

- Upright and spreading, usually wider than high, long arching branches.
- Moist, well-drained soil, sun or shade. May require some protection
- Foundation, screen, shrub border. Becomes large with age and needs room.
- Pretty with or without blooms

Loropetalum chinense

- Sun to part shade
- Can be pruned to small tree
- Some dwarf forms available

Osmanthus fragrans

- Sun to part shade
- Very fragrant blooms
- Will reach 15' but can be kept smaller
- Slow growth rate
- Marginal cold tolerance but worth using because of the fragrance
- Useful as a dense screen (leyland replacement)

Osmanthus x fortunei

- Large shrub or small tree
- Slow growth rate
- Oval shape
- Part shade to full sun
- White bloom spring and fall
- Fragrant blooms
- Takes very dry soil

Podocarpus macrophyllus “Maki”

- Sun to shade
- Protected site
- Columnar shape
- Some more oval shape
- Wide needle like foliage

Viburnum awabuki

- 15-20' shrub or small tree
- Fragrant blooms
- Possible winter damage some years
- Screen or specimen plant
- Large shiny leaves
- Not drought tolerant

Viburnum x pragense “Prague Viburnum”

- 6-12’ tall 6’ wide
- Dark green lanceolate foliage
- Sun to semi shade
- Takes very dry soil
- Good corner plant or in mixed shrub border
- Showy white blooms in spring

Viburnum macrocephalum (Chinese snowball viburnum)

- 10-18' huge mound
- Tough huge conversation plant
- Late Spring Bloom
- Sun to semi shade
- Takes very dry soil
- Deciduous to semi evergreen

Viburnum plicatum (Double file viburnum) “Shasta”

- Dogwood like bloom effect
- Sun to semi shade
- Tolerates some drought
- 10-12' tall and wide
- Deciduous
- Purple to red fall color
- 'Summer Snowflake' is only 6-8' tall

Exochorda racemosa (Pearlbush)

- Sun to semi shade
- Heavy bloomer in spring
- Thrives on neglect
- 8-10' by 6' wide
- Tolerates drought
- Deciduous
- Mixed border

Small Trees

15' to 25' is the average height in this
list

Acer palmatum

- The species will reach 20' or more
- Slow growing
- Green leaves until fall
- Fall color is variable
- Can be burned by late frost

Acer palmatum “Bloodgood”

- Grafted Jap Maple
- Semi shade
- 15’ H & W
- Slow growth rate
- Expensive plants
- Leafs out very early some years

Acer palmatum “Viridis”

- Threadleaf type or dissectums
- This cultivar is green with gold fall color
- Red Dragon and Tamukeyama (red) are also good in the south
- 4-8' slow growth

Acer palmatum “Red Dragon”

Chioanthus retusus (Chinese Fringe Tree)

- 15-25' tall – slow\med
- Blooms mid-April
- Full Sun to light shade
- Very pretty small tree
- Adapted to most soils (can take wet soils)

Cornus kousa var chinensis “Milky Way” Chinese Dogwood

- Semi shade
- 15-25’h 20w
- Slow growth
- Semi-Evergreen
- Blooms 2 weeks after native dogwood
- Some anthracnose resistance
- Heat tolerant

Cotinus coggyria (Smoke Tree)

- 10-15'T and 15-25'W
- Slow growth rate
- Full sun is best
- Tolerates drought
- Spring to Early Summer bloom
- Blooms Purple, Pink or White
- Short lived – 20 years average

Diospyros kaki “Fuyu” Japanese Persimmon

- Non astringent fruit
- Marginal cold hardiness
- 15-25’ H & W
- Full sun
- Tolerates dry soils (but will drop fruit in drought)
- Nice fall color (yellow to orange)

Magnolia stellata (Star Magnolia)

- 10-20' H and W
- Slow growth rate
- Sun to semi shade
- Fragrant showy spring blooms
- Tolerates dry soils
- “Crysanthemumiflora” has light pink flowers

Magnolia acuminata x denudata “Elizabeth”

- 20-30'H x 15'W
- Slow growth rate
- Light yellow fragrant blooms in Early spring
- Tolerates some drought
- Semi shade to full sun
- Nice foliage, bark and winter buds (large fuzzy brown)

Malus x (Flowering Crabapple)

- Full sun
- 6-25'H 10-20'W
- Blooms in pink, red and white
- Early spring bloom
- Flowers usually fragrant and showy
- Small messy fruit

Morus alba “Chaparral”

Weeping mulberry

- 8H x 8W
- Sun to light shade
- Grafted on standard plant
- Male – no messy fruit
- Shiny bold leaves
- Surface roots near trunk (therefore plant in beds)

Prunus x “Okame” Flowering Cherry

- 15-25H and W
- Short lived trees (15-20years)
- Tolerates drought
- Sun to semi shade
- Many pest
- Lots of colors

Prunus x yedoensis “Yoshino Cherry”

Prunus serrulata “Snowgoose” Oriental Cherry

- 20’H and vase shaped
- Resist some pest
- 15-20 year max life

Prunus persica (Ornamental peach)

- 15-25'H & W
- Tolerates some drought
- Short lived trees
- Lots of pest problems

Styrax japonicus (Japanese Snowbell)

- 15-25'H & W
- Sun to semi shade
- Slow to medium growth rate
- White fragrant blooms in late April
- Underused nice small tree
- Can grow as multi-trunk
- Very nice bark
- Tolerates drought

Vitex agnus-castus (Chastetree)

- 15-20' H & W
- Full sun
- Blooms late May-July (blue, lavender and white)
- 12-18" bloom spikes that repeat bloom
- Handsome palmate foliage
- Marginal cold hardiness
- Fast growth
- Tolerates drought

- *Vitex agnus-castus*
(Chastetree)
- Blooms resemble
butterfly bush

Green Giant Arborvitae

Leyland Cypress Substitute

- Fast-growing, evergreen plant to define property lines, screen undesirable views or serve as a windbreak
- 2007 Georgia Gold Medal winner
- Tolerates almost any soil condition
- Has shown excellent pest resistance, including deer browsing.
- 50 to 60 feet at 3 ft per year

Green Giant Arborvitae
(Thuja hybrid)
