

**ALABAMA BEEF CATTLE IMPROVEMENT ASSOCIATION'S**

**12TH ANNUAL**

# **FALL ROUND UP BULL & HEIFER SALE**

**Friday, November 9, 2007 at 11:00 AM**

**Alabama Livestock Auction, Uniontown, Alabama**

**OFFERING 82  
PERFORMANCE  
PROVEN 2 & 3  
YEAR OLD BULLS  
FOR SALE!**

- **ANGUS**
- **BRANGUS**
- **CHAROLAIS**
- **CHIANGUS**
- **SIMMENTAL**
- **SIMANGUS**

## **SALE WILL FEATURE:**

- Complete pedigree information
- Current EPD data
- Production weight data
- Breeding Soundness Documentation
- Current weights and scrotal measurements
- Electronic Id

**Auctioneer: Col. Tommy Barnes, AL License #1024**

*Perfecting Performance Since 1964*

## ~ Schedule of Events ~

**Friday, November 9, 2007**

**8:00 AM** Inspection of the bulls —Sale Facility  
Alabama Livestock Auction (334) 628-2371

**10:45 AM** Welcome to the 12th Annual Fall Round Up Sale

**11:00 AM** SALE will BEGIN! - Please Bring this Catalog with You!

The Restaurant at the Alabama Livestock Auction  
will be open for your convenience.

**Map to the Alabama Livestock Auction Sale Facility**

## \*Suggested Sale Terms and Conditions

Except for those stated in the below terms and conditions, there are no warranties, either expressed or implied, as to the merchantability of fitness for a particular purpose with respect to the cattle being sold at this auction.

The warranties and guaranties set forth in the "terms and conditions" are in lieu of all other warranties either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any party claiming through buyer, for any breach of warranty or guarantee therein provided, and all other obligations or liabilities.

**Time and Location:** The 12<sup>th</sup> Fall Round Up Bull and Heifer Sale will be held Friday, November 9, 2007 at 11:00 am at Alabama Livestock Auction, Inc. in Uniontown, Alabama (334) 628-2371.

**Bidding:** All animals will be sold to the highest bidder without reserve. The auctioneer will settle any disputes in bidding and his decision on such matters is final.

**Terms:** The terms of the sale are cash or check unless credit arrangements, including any possible reservation of security interest, have been made by the interested party with the vendor, Alabama BCIA, prior to sale. The party financially responsible for each purchase will be the person's name that registered to the purchasing buyer number.

**Purchaser's Risk:** Each animal becomes the purchaser's risk as soon as sold. It is advised to purchase insurance on each animal. Buyers are encouraged to transport their purchases on sale date. Arrangements need to be made in advance by the buyer for any animals held over for a later transport date.

**Insurance:** Insurance is available through Harding and Harding. Buyers wishing to insure their purchases may do so by contacting the sale clerk.

**Certificate of Registry:** A transferred certificate or registry will be furnished to the purchaser of each animal within forty-five (45) days following date of sale or receipt of full payment.

**Health:** All animals are eligible for interstate shipment. Interstate health certificates will be available for each animal upon request.

**Breeding Guarantee:** All animals are guaranteed to be breeders with the exception of: a) injury or disease occurring after sale; b) gross negligence or willful misconduct on the part of the purchaser.

Bulls are guaranteed breeders. Any bull which settles cows by natural service and passes a fertility test by competent veterinarians, mutually agreed upon by buyer and seller, during any 6 month period of trial (provided for in paragraph 2 of the section of these sale terms and conditions entitled "**Option and Privilege of Return and Adjustment**") shall be considered a breeder. Any guarantees with respect to the ability to freeze semen shall be by separate agreement between the buyer and seller.

**Identification:** Seller offers each animal with a readable tattoo corresponding to its registration paper. Buyer agrees to check tattoo for accuracy. In those cases where a nickname is used, it shall be accompanied by the official registered name and number of the animal.

**Options and Privileges Or Returned Or Adjustment:** All claims for adjustment must be made in writing within six months of the sale date.

In the event the animal may be returned to the farm of the seller if in good condition and complying with the health requirements of the seller's state. The seller shall be entitled to a six (6) month trial following the return of the animal in which to prove the animal is a breeder. If at the end of six months the seller is unable to prove the animals is a breeder, the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the purchase price. The return of the full purchase price, shall be in any case deemed full satisfaction and settlement. Any expense incurred from transportation of an animal claimed to be a non-breeder shall be the responsibility of the purchaser, except that the seller shall be responsible for transportation costs in excess of the distance between the purchaser's farm and the location where the sale took place. If the seller proves the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal and pay all expenses incurred for transportation.

If the animal is sold, and at a later date, proves not to be eligible for registration under the Association rules, the seller shall be obligated to make satisfactory adjustment on the purchase price to the buyer, or at the buyer's option refund the purchase price upon the return of the animal to the farm of the seller. Any expense incurred for transportation shall be the responsibility of the purchaser, except the seller shall be responsible for the transportation costs in excess of the distance between the purchaser's farm and the location where the sale took place.

**Rights and Obligations:** The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction. All persons attending the sale do so at their own risk. The seller, Alabama BCIA, or Auburn University will not assume any liability, legal or otherwise, for the safety of those attending this sale.

**Mail Bids:** Mailed or telephoned bids will be handled in a most confidential manner if you are unable to attend the sale personally. Please contact the Auctioneer (Col. Tommy Barnes), or Michelle Elmore.

\*For Voluntary Consideration and Use By Sellers In Their Independent Business Judgment

## Explanation of EPDs

**EXPECTED PROGENY DIFFERENCES (EPD):** The expected difference in performance of a bull's progeny when compared to the average progeny performance of all bulls evaluated. EPD's are reported in pounds and are directly comparable across all herds within a breed, but not across breeds.

**ACCURACY:** A measure of certainty regarding the genetic merit of a bull. Accuracies are reported as a decimal number between zero and one. Larger values indicate greater accuracy and more certainty that a bull's EPD values will not change with additional progeny information.

**CALVING EASE DIRECT (CE):** Predicts the ease with which a bull's calves are born to first calf heifers. EPD values for calving ease are reported as deviations in the percent of unassisted births. When comparing calving ease EPD values of two sires, the larger EPD value indicates a higher percentage of unassisted births for calves sired by this bull.

**MATERNAL CALVING EASE (MCE):** The ease with which a bull's daughter's calves as first calf heifers. EPD values for maternal calving ease are reported as deviations in the percent of unassisted births. When comparing maternal calving ease EPD values of two sires, the larger EPD value indicates a higher percentage of unassisted births for calves born out of this sire's daughters..

**BIRTH WEIGHT EPD (BW):** Predicts the difference in average birth weight of a bull's calves compared to calves of all other bulls evaluated. Compare the bull's EPD to the breed average to determine when he is above or below average for birth weight EPD for his breed. If the birth weight is higher than breed average, he will sire heavier calves at birth than the breed average.

**WEANING WEIGHT EPD (WW):** Weaning weight EPD predicts the difference in average adjusted 205-day weight of a bull's calves compared to calves of all other bulls evaluated.

**MILK or MATERNAL EPD:** Maternal (Pure Milk) EPD predicts the difference in **average 205 day weight** of a bull's daughters calves (due to differences in milking ability) compared to calves of all other bulls evaluated. Note, this is pounds of calf weaning weight and **not** pounds of milk.

**YEARLING WEIGHT EPD (YW):** Yearling weight EPD predicts the difference in average adjusted 365-day weight of a bull's progeny compared to progeny of all other bulls evaluated.

**SCROTAL CIRCUMFERENCE EPD (SC):** Scrotal circumference EPD values predict the difference in yearling scrotal circumference (measured in centimeters) of a bull's male calves compared to male calves of all other bulls evaluated.

**ULTRASOUND INTRAMUSCULAR FAT (%UIMF):** A predictor of the difference in ribeye of progeny at a given endpoint.

**ULTRASOUND RIBEYE AREA (UREA):** A predictor of the difference in square inches of ribeye area for a sire's progeny compared to an average sire.

**ULTRASOUND BACKFAT (UFAT):** It is expressed in inches and is a predictor of the difference in external fat thickness at the 12-13<sup>th</sup> rib of a sire's progeny compared to an average sire.

**CARCASS WEIGHT EPD (CW):** Carcass weight is a good predictor of **total** retail product, but not **percent** retail product. Selecting sires with higher EPD values for carcass weight will result in progeny carcasses with more total retail product at a constant fat and age endpoint. The industry target weight range for carcasses is 650 to 850 pounds.

**MARBLING EPD:** The marbling EPD can be used to select sires that will produce progeny with more marbling at a constant fat or age endpoint. The genetic correlation between marbling score and external backfat at the 12<sup>th</sup> rib is nearly zero. Intramuscular marbling contributes to the overall eating experience of beef. Intramuscular fat plays a small role in tenderness of beef. It also is a significant component of juiciness and flavor of the beef product.

**RIBEYE AREA EPD (REA) :** expressed in square inches, is a predictor of the difference in ribeye area of progeny at a given end point.

**FAT THICKNESS EPD (FAT):** The heritability of 12<sup>th</sup>-rib fat thickness has been estimated to be 0.25 from the Angus carcass database. According to research from MARC, there is a high negative genetic relationship (-.74) between external 12th rib fat thickness and percent retail product. From field data this correlation has been estimated at -.84, but it must be remembered that the % retail product used for the sire evaluation is made up of component traits of which fat thickness is the biggest contributor.

### **YIELD GRADE OR PERCENT RETAIL CUTS EPD**

**(%RP) :** An estimate of the yield of closely trimmed, boneless retail cuts from the round, loin, rib and chuck. Selecting sires with higher EPD values for percent retail cuts will result in progeny carcasses with a higher percentage of closely trimmed retail product at a constant age. Can also be measured and estimated by using carcass ultrasound, designated %URP.

**Average EPD Values for Non-Parent Bulls from 2007 Breed Sire Summaries**

## Care of Newly Purchased Bulls

Whatever system your bull has been evaluated in, young bulls do require an adjustment period prior to being used for breeding. This is referred by some as a “hardening period”. Others refer to it as a “let down” period.

Young bulls, especially those of breeding age, do require attention for continued growth and proper development. Regardless if they are home raised or newly purchased, proper feeding, care and management now will give your bull the opportunity to continue growing and allow him to develop into a sound and profitable herd sire.

Several management practices should be observed when newly purchased bulls are brought home. These practices can help ensure that each new bull has a long and productive future with good productive performance.

- Have an area with fresh water and good quality hay to keep the bull(s) in upon arrival, so they will have time to settle down and become familiar with the surroundings.
- After allowing to drink water and eat hay, you may feed additional energy at approximately 1 percent of body weight
- If you are planning to turn the bull(s) out with the cow herd upon arrival, bring the herd to a holding area and allow the bull(s) to return to the pasture with the herd.
- Avoid turning your newly purchased bull(s) in with an older bull. We must reduce the chance of injury.
- Consider limiting the number of females you want to settle during the breeding season to 20 the first year.
- Avoid excessive loss of body condition before or during the breeding season. You may want to rest him for 1 to 2 weeks depending on the breeding activity of your herd. If necessary, feed him additional energy if excessive loss in body flesh condition is noticeable. Hay and/or pasture alone will not provide sufficient nutrients to meet the requirements of young, growing, active bull(s).
- If there is one bull in the pasture, as he breeds the cows, record the breeding date. Non-return to heat is a good indication your bull is settling the cows.
- Treat for internal parasites at the end of the breeding season. Provide effective external parasite control as needed.

- **Remember, bulls are guaranteed by consignors to be breeders only if they are managed correctly after the sale.**

Young bulls should be limited to a minimum number of cows to service. The number is decided by his age. The following guidelines can be used:

Bull's Age	Number of Females
12-15 months	10 to 12
15-18 months	12 to 18
18-24 months	18 to 25
24 months and older	25 to 35

Place young bulls in well fenced lots before and after breeding season to keep bulls away from cows in heat. There should be shade and plenty of clean water in each lot. Provide free-choice minerals and routinely treat for parasites.

### Relationship of Ultrasound Intramuscular Fat (%) to USDA Quality Grades, Marbling Degree, and Marbling Score

Percent Intramuscular Fat	Quality Grade	Marbling Degree	Marbling Score
2.3-3.0	Select-	Slight 0-40	4.0-4.4
3.1-3.9	Select+	Slight 50-90	4.5-4.9
4.0-5.7	Choice-	Small 0-90	5.0-5.9
5.8-7.6	Choiceo	Modest 0-90	6.0-6.9
7.7-9.7	Choice+	Moderate 0-90	7.0-7.9
9.9-12.1	Prime-	Slightly Ab 0-90	8.0-8.9

## 2007 Fall Round Up Sale Committee

- Richard Dyar, Crossville  
BCIA President
- Gordon Burkhalter, Clanton  
BCIA Vice-President
- Randy Moody, New Market
- Chuck Madaris, Hope Hull
- Rusty Graydon, Montgomery
- Jimmy Holliman, Marion Junction
- Harrell Watts, Jr., Sardis
- Tim Mims, Clanton
- Johnny Gladney, West Alabama  
Regional Extension Agent
- Brenda Glover, West Alabama  
Regional Extension Agent

### Sale Coordinated By:

Michelle F. Elmore  
Alabama BCIA  
40 County Rd 756, Clanton, AL 35045  
(205) 646-0115  
Email: [elmormf@auburn.edu](mailto:elmormf@auburn.edu)  
[www.albcia.org](http://www.albcia.org)

### Let a Alabama BCIA Membership Work for You!

#### **BCIA works for its members to:**

- Build a performance database to guide management & genetic selection for herd improvement
- Provide comprehensive performance records for a marketing advantage
- Provide avenues to expand marketing opportunities for your cattle
- Provide a source of performance proven herd sires & replacement heifers

#### Interested and want more information?
