Getting Started

Step 1: Enroll in the Alabama 4-H Grows Program, select Tier II Project, and pay the registration fee through 4HOnline. If you need help, contact your county Extension office.

- Date completed: ______________________

Step 2: Watch the Alabama 4-H Grows Tier II video/webinar. Check with your county Extension office for details on how to view the webinar.

- Date completed: ______________________

Selecting Your Gardening Site

Step 1: You will need to decide whether your garden will be a traditional garden or a raised bed garden (see below for definitions of both).

Traditional Garden: A traditional garden is one in which you plant your seeds and plants directly into the soil.

Raised Bed Garden: A raised bed garden is one in which you construct a raised garden frame that is at least 6 inches higher than the surrounding soil. The bed is filled with growing media such as a vegetable garden soil mix from a local home and garden store. If you need directions on how to construct a raised bed garden, see Extension publication ANR-1345, “Raised Bed Gardening,” or visit https://www.aces.edu/blog/topics/lawn-garden/raised-bed-gardening/.

The garden area for tier II should be approximately 40 square feet (4’x10”) (not included with project).

When selecting the site, make sure that it will receive at least six to eight hours of direct sunlight each day. It will be helpful if you have a water spigot or water source close by so you can easily water the garden without dragging a long garden hose. The tier II garden project (summer) will provide a larger and broader gardening experience for participants. The summer project will include tomato plants (3), bell pepper (2), banana pepper (2), jalapeño pepper (2), zucchini (2), and yellow squash (2) or comparable plants/seeds.

- Date site selected: ______________________

Step 2: Preparing the garden for planting by conducting a soil test.

After you have chosen your garden site, you will have to decide whether you need to conduct a soil test (optional). A soil test will indicate how to provide your garden plants with the right types of nutrients for optimal plant development. The cost of the soil test is $7, which is not covered by 4-H for this project. The following explains how to conduct a soil test if you decide to do one.

Soil Test (Optional)

Traditional Garden: If you are growing a traditional garden, you need to conduct a routine analysis soil test. If the garden has been tested in the past three years, you may skip this test. The cost for the test is not covered by 4-H for this project. To conduct the test, go to www.aces.edu/blog/topics/forage-soil-testing/routine-soil-analysis and download the routine soil test form (Alabama Extension publication ANR-2307). The instructions for performing the test are on the form. When you have followed the instructions, return your sample to your county Extension office, and they will send it to the Auburn University Soil Testing Laboratory. You should receive the results in about two weeks after submitting the report.

Because you are soil testing a small area, the following formula will help you figure the percentage of an acre that you will be testing. This is important when you take the soil analysis and break it down for your area.
Square feet area of garden/43,560 of acres (square feet in acre) x 100 = % of an acre

Example: 54 square feet/43,560 = 0.001239 x 100 = 0.1239 % of an acre

Raised Bed Garden: If you are gardening in a raised bed garden filled with a commercial garden soil mix, you will not need to conduct a soil test this year. If the garden is three or more years old, you should conduct a special soil test called a special soil analysis. When you access the form at www.aces.edu/wp-content/uploads/2019/01/SoilFormRevised.pdf, you will see that there are several choices. The only test you need is the S18 for home garden use in raised beds. The instructions for performing the test are on the form. When you have followed the instructions, return your sample to your county Extension office, and they will send it to the Auburn University Soil Testing Laboratory. You should receive the results about two weeks after submitting the report.

Because you are soil testing a small area, the following formula will help you figure the percentage of an acre that you will be testing. This is important when you take the soil analysis and break it down for your area.

Square feet area of garden/43,560 of acres (square feet in acre) x 100 = % of an acre

Example: 54 square feet/43,560 = 0.001239 x 100 = 0.1239 % of an acre

Check one of the following:

_____ I did not conduct a soil test this year.

_____ I conducted the soil test this year and have included a copy of the soil test in my journal.

_____ I followed the soil test recommendations.

Date completed: ______________________________
**Step 3:** Pick up your plants from your county Extension office or from the designated pick-up site. You will be contacted when it is time to pick up your plants.

Date of delivery to you: ________________________

**Step 4:** Begin your Alabama 4-H Grows Project and Journal.

Before you plant, map out your garden using the garden planning page in your journal. Remember to think about proper spacing between plants as you create your garden design. Refer to the following suggested spacing information during this step of the garden project.

**Traditional Garden Spacing:**
- Tomato plants—24” between plants and 36” between rows
- Bell, banana, and jalapeño pepper plants—18” between plants
- Zucchini and yellow squash plants—36” between plants and 48” between rows

**Raised Bed Garden Spacing:**
You will be able to space plants closer in a raised bed garden because it is easier to control watering and plant maintenance.
- Tomato plants—24” between plants and 12” from edge
- Bell, banana, and jalapeño pepper plants—18” between plants and 12” from edge
- Zucchini and yellow squash plants—24” between plants and 12” from edge

Date design completed: _________________________

Figure 1. Traditional garden design (1’x1’ scale).

Figure 2. Raised bed garden design (4’x12’ garden).
Planting Your Garden

**Step 5:** Carefully remove the plants from the plant packets, dig a hole deep enough to allow the root ball to be completely buried in the soil. Push the soil back in the hole around the roots and lightly pack the soil around the plant. Water the plants, and they should be ready to grow.

If the plants come in a peat pot, do not remove the pot before planting. Instead, remove the plastic label wrapped around the peat pot, and then tear the pot along the sides. Plant the pot with plant in the soil.

With tomato plants, you can remove the bottom couple of leaves and then plant the roots and part of the stem below the soil level. The stem will sprout roots along the buried part of the stem, helping the plant to develop a bigger root system.

**Step 6:** Make an entry in the gardening journal every time you interact with your garden (watering, moving containers, or other activity). At minimum, you should be making at least two entries per week throughout the gardening project.

When your garden is ready to be harvested, please make an entry in the Alabama 4-H Grows Harvest Journal. (Harvesting may be a one-time event or in the case of many summer vegetables, daily or weekly for a period of several weeks once the produce reaches that point of maturity.)

Complete the Alabama 4-H Grows Weather Charts daily throughout the project. This is important as weather factors such as temperature and rainfall per day all have an impact on the success of your garden.

Date you planted and started your journal: ________
Garden Planning: Layout

Date plan designed: ________________________  Time spent on plan: ________________________

Use the following grid to lay out your garden design. Create a key or label the plants in your garden design. Make sure you show the boundary of your garden on the grid and then locate the plants within the boundary.

What types of produce and number of plants are you planting in the garden?

Time spent in garden: __________________________

Weather Conditions

Make sure you record high/low temperature for today as well as any precipitation/water provided to the garden using weather charts. Use a local weather station to help you find this information.

_____________________________________________

_____________________________________________

Air temperature: _______________________________

Soil moisture (check one of the following):

Dig a small hole in the soil if needed to check the soil moisture.

[ ] Moisture visible at surface without moving soil.
[ ] No visible signs of moisture in top 2 inches of soil.
[ ] Signs of moisture visible at 3 inches or deeper.

If soil is lacking moisture, make sure you water the garden.

Weather Charts: Temperature

Using two different colored pencils, record the high and low temperatures for each day on the graph below. Once you record the high and low temperatures, connect with a line all of the highs to one another and all of the lows to one another in sequence.

Example: Red Pencil—Daily High Temperature | Blue Pencil—Daily Low Temperature

Temperature Chart for the Month of _________________, 2019.
Weather Charts: Temperature

## Total Harvest Record

Refer back to your daily harvest record. Total the number of times you harvested. Then, total the weight and record the data below.

<table>
<thead>
<tr>
<th>Plant Type</th>
<th>Number of times harvested</th>
<th>Total weight harvested</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tomato</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Bell Pepper</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Banana Pepper</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Jalapeño Pepper</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Zucchini</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Yellow Squash</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

What was the total weight of the produce that you donated to a local charity?

__________________________________________________________________________________________________

Looking back through your gardening journal and harvest record, how much time was spent in your garden?

__________________________________________________________________________________________________

What did you learn from your gardening experience?

__________________________________________________________________________________________________

__________________________________________________________________________________________________

__________________________________________________________________________________________________
