

The Alabama Cooperative Extension System is the primary outreach and engagement organization for the land-grant mission of Alabama A&M University and Auburn University in cooperation with Tuskegee University.

Our unique
combination of
core values
differentiates Extension
in today's education
marketplace.

Research-based
programs, materials, and
educational activities

Positive relationships
with clients, communities,
partners, and stakeholders

Relevant programming
that addresses current societal
challenges and opportunities

We help millions of Alabamians.

We provide research-based educational programs in agriculture; forestry, wildlife, and natural resources; family and consumer sciences; economic and community development; 4-H and youth development; and urban affairs.

We use innovative methods to deliver educational content to communities and homes.

Our technical capabilities expand our reach and save time and money for our educators and partners: website (www.aces.edu), self-paced, online courses, mobile applications, digital books, and interactive videoconferences.

We build strong and effective partnerships.

We have been in the partnership business for a century to secure private partnerships and grants. We also receive funding and resources from the following: federal, state, and county appropriations, federal grants, and county donations of office space and utilities.

Partner with Us

We are committed to ensuring that all people we serve have access to science-based information that improves quality of life and economic well-being in a way that connects and inspires continued advancement in every community.

How We Work to Achieve Our Goals

LOGIC MODEL

Importance Is effort valued by stakeholders? Is effort making a difference?

Reasonable Is effort connected to planned activities? Does effort fit under goal?

Realistic Is effort doable considering available resources, stakeholder engagement, relevance to end users?

Measurable Can changes be measured and documented?
